Bridge Course Report 2022-23

In the Foundation Course, most of the students admitted in the first year are from a rural area and some of them are not so advanced in some subjects due to lack of facility. Some students are unaware of the new subject as they do not have a previous background. To boost the academic skills and confidence of such students in the learning process, all the departments of the college conduct the bridge course for first-year students before the commencement of regular classes. Annasaheb Awate College has organized a foundation course for 12th-pass students under the guidance of Hon. Principal Dr. K.G. Kanade. The goal of the Foundation Course is to prepare a student to study Bachelor of Science effectively.

The purpose of the foundation course conduction is not only to bridge the gap between subjects studied previously and the subject would be studying in the first year but also to clear and revise the fundamental concept of the topic whether it belongs to the previous course or new course. Foundation Courses are conducted for all courses but those students who seek the admission in first year having new subjects, need more of a bridge to the course as they did not have a previous background.

It is seen that the foundation course is beneficial for students. As in the teaching-learning process, students can easily grasp the advanced topic in regular classes and it is convenient for faculty to teach the advanced topic.

Department of Electronics has taken up the initiative in this foundation course entitled lecture **“Application of Electronic Science”** which has been taken in the class. There were **14** students enrolled in this course. The Foundation course in charge was Ms. Afroj M Dange has took lectures on **08th July 2022 from 10.00 to 11.00 AM.**

The highlights of the program are as:

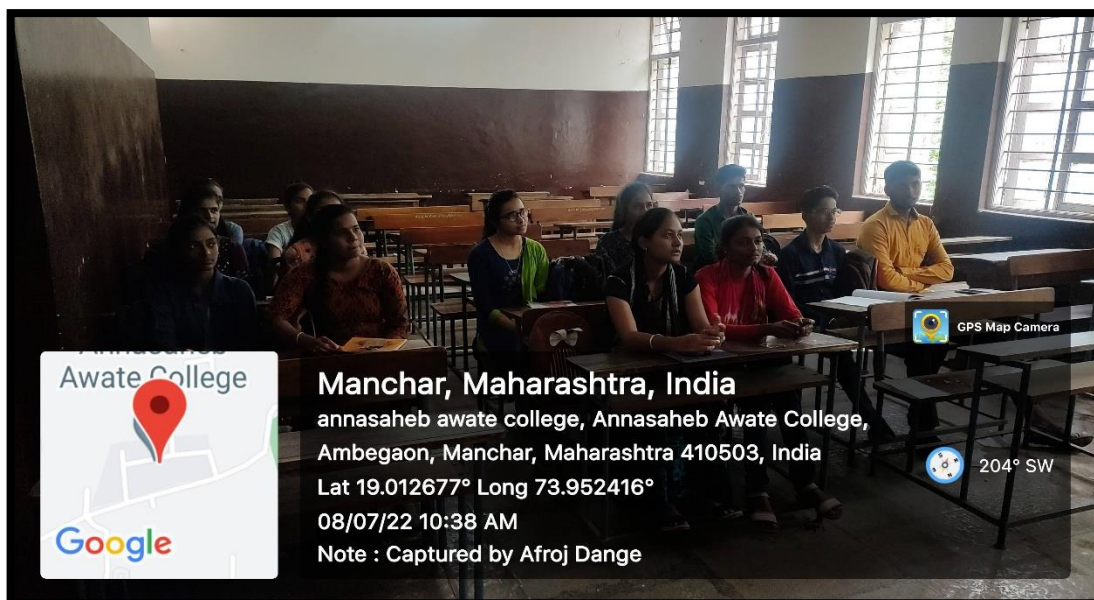

- 1] What is Electronics?
- 2] Use of Electronics in daily life
- 3] Carrer in Electronics: in the Government and Private Sector
- 4] How to be an Entrepreneur in Electronics

During the foundation course, faculty identifies the strengths, weaknesses, learning levels, and students' areas of interest. Also, Promoted and motivated students to take subjects.
