DEPARTEMENT OF ELECTRONIC SCIENCE
2022-2023

INTRODUCTION:

The Gramonnati Mandal Institute of Narayangaon was founded by the late Guruvarya RP Sabnis. The institute has been a beacon of pioneering education in the northern region of Punc District, Maharashtra. Our great founder Guruvarya Sabnis was a prolific thinker, great orator, and passionate patriot. Being a visionary educationist he dedicated his life to uplift the rural area by binding it to education. His foresight recognized the need to have a multidimensional education system that would go hand in hand with the rural life. The majority of rural population being farmers, he associated agriculture with formal education and thus the Agricultural School of Narayangaon was conceived of his exceptional thought. Since then the Gramonnati Mandal has carried this beacon of education forward in the hope of providing a progressive and productive path to the people. Its students no doubt have become self reliant and proudly bear self esteem on their sleeves.

Purpose:

In conclusion, it can be said that 'Industrial Visit' is a most practical approach towards learning through interaction, working practices etc. and hence gives a perfect reality check to the students.

1. Industrial visit gives the students an exposure to current work practices as opposed to theoretical knowledge being taught at their college classrooms.
2. Industrial visit helps students to combine their theoretical knowledge of Food Processing operations with the practical knowledge of its actual functioning.
3. When pursuing a professional degree like Food Processing and Quality Management, industrial visit has its own importance for students because only the theoretical knowledge is not sufficient for their proper understanding of the actual food processing operations at the ground level.
4. The practical knowledge of how a food processing business can be started and what are the real life challenges being faced can only be learnt through have practical experience from industrial visits.
5. Another important perk of going for an industrial visit is that it acts as a bridge between the student and their dream company. The chances of building-up a good relationship with the employees and actually getting an opportunity for an internship or even placement in that company is maximum based on their outstanding performance in spot assignments and showing good manners.

EXCURSION REPORT

Date of visit: Saturday, 12/11/2022

Place: Naneghat, Kukdeshwar and Darya Ghat

Botany at a glance:

Botany is a science of plants. It deals with basic study of plants and their activities as well as studies related to scientific applications of botanical knowledge. Basic knowledge of botany will help us to solve various problems and making the life happy and comfortable. Therefore, awareness about plant is essential as the plants fulfill most of our needs.

Importance of Excursion:

Botanical science cannot be studied in restriction of a classroom and laboratory. To study botanical science, one has to go in nature or in plant flora to study them in their natural habitats.

The study tour was arranged by Botany Department of our college to have actual experience as "Experience is our best teacher". There is a wide scope to observe various plant species to know new genera, species and varieties and to collect these plant species. We also know about various new and unique plants. It helps to increase our practical knowledge. A study tour with scientific attention gives us a lot of information directly which we cannot obtain in classroom, laboratory or also by reading any book in library.

About College:

Annasaheb Awate Arts, Commerce and Hutatma Babu Genu Science College was established in 1966 by Rayat Shikshan Sanstha. The founder of the Sanstha, Padmabhushan Dr. Karmaveer Bhaurao Patil established the Sanstha in 1919. The institution rose up to greater heights due to the unprecedented contributions of Bhaurao Patil in the realm of education. Annasaheb Awate whose name has been given to this college was a veteran educationist and a social reformer of this region besides, the science faculty is named after Hutatma Babu Genu who breathed his last while fighting against the atrocities of the British rulers. The college was responsible for educating the first generation of the region. The college owns 105 acres of land. 55 acres of land is used for infrastructure while remaining 50 acres is used for the social forestry. The college campus has a rich environmental and natural beautiful background therefore; the agro-based projects such as mango, banana, guava, amala, custard apple, fig, coconuts, tamarind, nuts, medicinal plants, rose garden etc. are being carried on.

Aims and objectives:

1. Observation and identification of the rare, endemic, endangered, threatened and medicinally important plants from all maximum localities, which are mentioned in the Red Data Book and different Floras published by various workers.
2. To create awareness in the tribals of the respective localities regarding the position of these plants.
3. To create awareness in the undergraduate students regarding the rare, endemic, endangered, threatened and medicinally important plants.
4. To utilise the youth (the undergraduate students) for regeneration of the rare, endemic, endangered, threatened and medicinally important plants and for their reclamation on their original localities.

5. To create an appropriate source to the tribals who are dependent on the forest, to develop awareness in them about dangers of their survival.
6. To create ideal forests with maximum plant diversity and medicinally important plants and regenerate ethno botanical status.
7. To create an ideal botanical garden with maximum RET species.

Ozar:

The Vighnahr Ganpati Temple Ozar is a Hindu temple dedicated to the Lord 'Ganesha'. Son of Lord Shiva and Parvati, the elephant-headed god of wisdom. The Vighnahr Ganpati Temple is popular for its Golden dome (Sonayacha Kalash) and its Deepmala's (a stone pillar). Among Ashtavinayakas Temples, Vighneshwara temple is the only temple with have a golden dome (Sonayacha Kalash) and pinnacle.

Lenyadri :

Lenyadri, sometimes called Ganesa Lena, Ganesh Pahar Caves, are a series of about 30 rock-cut Buddhist caves, located about 4.8 kilometres north of Junnar in Pune district. Other caves surrounding the city of Junnar are: Manmodi Caves, Shivneri Caves and Tulja Caves. The Lenyadri caves date between the 1st and 3rd century AD and belong to the Hinayana Buddhism tradition. Twenty-six of the caves are individually numbered. The caves face to the south and are numbered serially from east to west. Caves 6 and 14 are chaitya-grihas, while the rest are viharas. The latter are in the form of dwellings and cells. There are also several rock-cut water cisterns; two of them have inscriptions. The layout of the caves, in general, are similar in pattern and shape. They generally have one or two sides with two long benches for occupants' use. Two of the central cells of Cave 7 – originally a Buddhist vihara – were at an unknown later date appropriated for the worship of the Hindu god Ganesha. The rest of the cells and the hall of Cave 7 remain in their original form.

Manikdoh Leopard Rescue Centre (MLRC) :

In 2007, Wildlife SOS in collaboration with the Maharashtra Forest Department established the Manikdoh Leopard Rescue Centre in Junnar, near Pune. The centre is home to over 30 leopards and provides temporary or long-term care for leopards injured by villagers or trapped in conflict situations.

These man-animal conflict scenarios with leopards are complex ones caused by human encroachment upon wild leopards' natural habitat. Leopards struggle to find a foothold in the

forest and are pushed to take cover in sugarcane farms, relying on village livestock to survive. This has caused indiscriminate trapping and killing of leopards perceived to be a threat. The centre also houses several orphaned leopard cubs who cannot be released back into the wild as they are severely imprinted on humans.

Our primary goal is to contribute to the conservation of the imperilled Indian leopard population on one of the most heavily human-populated and dominated landscapes in the world. We continue to conduct regular training programmes detailing "capacity building" for forest department staff and for vets in outlining the use of gear. We also provide education to local farming communities thereby increasing their awareness and tolerance for coexistence with these beautiful cats.

Wildlife SOS manages the centre in collaboration with Maharashtra Forest Department with support from Humane Society International, Australia and Terra-et Faune, Switzerland.

Manikdoh Dam Ecosystem:

The wetlands and wetland macrophytes play crucial role in the ecosystem with direct as well as indirect benefits of uncountable value. A study was undertaken to document angiospermic wetland macrophytes in Pune district, Maharashtra state, India. Results of the study revealed that, there are 11 categories of wetlands in Pune district including seven natural and four man-made. These wetlands harbour 457 angiosperms belonging to 72 families. Of these, 457 taxa, 204 taxa are under different categories as per IUCN, while 253 are not evaluated. Among recorded taxa, one is 'Critically Endangered' (*Eriocaulon santapau*), three 'Endangered' (*Iphigenia stellata*, *Eriocaulon richardianum* and *Dimeria hohenackeri*), two 'Vulnerable' (*Isachne bicolor* and *Utricularia albocaerulea*) and 198 taxa are 'Least concerned'. Total 67 Indian endemic taxa are recorded from the wetlands in the study area

Naneghat:

Unleash an adventurous expedition and experience the great adventure that lets you traverse through a mountain pass in the serene Western Ghats. The Naneghat Trek takes you through the rugged trails of untouched patches of nature.

Naneghat a mountain pass in the Western Ghats. During the reign of the Satavahana (200 BCE–190 CE), the pass was extensively used as a trade route between Kalyan and Junnar. Literally, the name nane means "coin" and ghat means "pass". The name is given because this path was used as a tollbooth to collect toll from traders crossing the hills. The way is clearly marked and passes through dense teakwood forests. Climbing from the forest you reach to the base of 'Nanacha Angatha', which is pinnacle of Naneghat plateau. From this base, a 2 meter wide pass connects to the actual plateau. This pass called as Naneghatachi NaLi has been carved and cut in stones by emperors of that time. This 60 meter long pass takes you to the Naneghat plateau.

It is located 26km away from Junnar Town at 19.2710 N,73.7200 E & 19.2980 N,73.6720 E, 700m. The rocky hills of this region are well known forts. There is a tar road from Junnar to Naneghat (Ghatghar Village). The basalt is exposed as a broad expanse at a low altitude and bounded by sacred groves, reserve forest patches, rice fields and vertical slopes. The outcrop and its surroundings are affected by biotic pressures. Hemadri (1980) and Rahangdale (2009) denoted that Naneghat Plateau area is rich in plant diversity.

The Western Ghats are full of high altitude plateaus/rock outcrops amidst mesic forests. Throughout the world, rock outcrops are isolated habitats and known for their uniqueness with respect to environmental variables and biodiversity and well known as centers of species endemism. In India such special areas are geographically known but very less information is available about their floristic wealth. Available studies are occasional and limited to ecology. Due to a lack of appropriate information and errors in the study models of random sampling, important habitats may get misinterpreted and pose a threat to conservation. A comprehensive botanical study of two rock outcrops, Durgawadi Plateau (DP) and Naneghat Plateau (NP),

on the escarpment of the northern Western Ghats revealed a very high within-site (360 taxa on DP and 249 taxa on NP) and between-site plant diversity totaling to 443 taxa of specific and infraspecific ranks. The individual outcrop areas are very small (2.8793km² and 0.7524km² respectively for DP and NP) but harbor a huge diversity of flowering plants. The commonly shared taxa are relatively low (37% of the taxa recorded) indicating that the two outcrops are floristically very distinct from each other. They are also distinct in terms of soil composition, though on the same crest line of Sahyadri and quite close to each other. The study emphasizes the need for micro-level inventories of smaller areas by taking intensive surveys for documentation of different aspects of the abiotic and biotic diversity as well as other environmental and anthropogenic variables.

Kukdeshwar :

Kukdeshwar Mandir or Temple is located in the Pur village on the bank of Kukdi River at a distance of 15 Km from Junnar on its western side in the Pune district of Maharashtra. It is a 12th century Shiva temple which has been built as per Hemadpanthi architecture. The site of the temple looks amazingly beautiful and the Kukdi River on its norther side adds to its beauty.

It is a popular temple of Lord Shiva which is noted for its splendid carvings and sculptures on the inner and outer walls of the temple. It lies in close proximity of Chavand Fort, also known as Fort of Prasannagad at a distance of mere 3 Km. The roof of this temple is currently in a dilapidated state but renovation is being carried out.

Darya Ghat:

Darya Ghat is an ancient cattle trade route used for connecting Amboli village of the Ghat section to the Palu village in Konkan.

7. *Objective*

One day field visit to college campus was organized under the following objectives:

1. To upgrade and extend the knowledge and understanding of the subject beyond the classroom.
2. To provide the students an insight regarding the species diversity in the college campus.
3. To provide students with an opportunity to learn practically through interaction.

8. *Program Report*

Department of Zoology organized a field visit on November 12, 2022 to College Campus for the students of SYBSc and TYBSc Zoology. Total 39 students along with 5 faculty members were present. Students were shown the eutrophication of the lake near college and were explained the reason behind it. Student observed various species of insects and observed their activities. Apart from this they also collected the insect specimens for the study. This visit was mainly focused on to understand the species diversity in college campus.

9. *Program Outcomes:*

Students understood the nature of animal diversity in the college campus. They were able to identify the various species of insect. They were able to demonstrate the various body parts of the insects. Students also collected the insect specimen for their study. Field visit provides real-world experience, increases the quality of education, and improves the social relations, outside of the four walls of a classroom. The idea behind this experiential learning is to contextualize knowledge in order to develop a deeper understanding. Many field visit combine educational content with team-building activities, such as working together to complete assignments and projects. In fact, it is often a good idea to go on a field trip to help create a bond between the students. Good field visit can provide an integral part of the learning experience if they are planned well.
